TRADITIONAL PAVING

Natural stones are one of the oldest and the most beautiful building materials available on the earth. Stone pavings are quarried from different geographical locations and selected for its hardness, durability, texture, material colour and various finishes. Our range of ethically sourced Indian Natural Sandstone, Limestone Paving offers high value for money. Traditional Pavings have different colours and sizes, that makes it enormously popular with designers and landscapers. In Traditional Abstract Paving, the underside of the slab is shaved by a machine to the specific thickness, usually 22mm to give it a uniform thickness, available in warm autumned tints, beige, cool grey, or even with fascinating fossil like markings, it marks well with almost any style, contemporary or traditional. These Traditional Paving are available in a combination of project packs, single sizes and circular kits. Natural Stone Traditional Paving offers a unique & distinctive qualities, as each individual paving stone is unique in its material beauty. The many natural tone variations, different surface profiles and exquisite natural veining makes every paving slab unique, thus giving your patio a touch of exclusivity.

BLACK LIME

Black Limestone is a popular choice particularly in heavily planted gardens as the dark slabs offer a contrast to floral areas and turf with its natural cleft surface and hand chiselled edges, Black Limestone paving slabs are perfect for areas where slate is prevalent and where a contrasting colour is required from light to dark. This Natural Limestone paving fades in colour over a time, so to ensure that it retains its colour we recommend sealing the paving or setts with colour enhancers as soon as possible after installation.

CRAZY PAVING

(22mm Calibrated)

To add versatility and extra dimension to your landscape design. Crazy paving is the best alternative, if you don't like the neat look of straight even pavers, crazy paving may be the perfect solution for your outdoor area. Crazy pavers, also known as random pavers are a mixed collection of natural stones in different shapes and sizes. Crazy paving is very flexible product that allows you to create your own patterns and designs, providing depth and texture to any area. Our Crazy paving offers a diverse range of natural stone types providing a great design flexibility for residential and commercial paving projects. Our crazy paving stones are dense and thus incredibly durable, having a natural variation in colour and texture and have been processed to ensure a relatively consistent depth accuracy. Available in Mint Fossil, Light Grey and Raj Green, it allows you to create different bond work effects and designs giving it a rustic appeal.

LIGHT GREY

A photograph of a backyard patio. The patio is paved with large, irregular, light-colored stone tiles. In the foreground, a black, ornate planter holds a bouquet of red and white flowers. To the right, a stone retaining wall borders a garden bed with a path of stepping stones. A hammock is strung between two trees in the background. The scene is surrounded by lush green trees and a wooden fence.

DRIVEWAY COBBLES & BLOCK PAVING

Sandstone Cobbles or 'setts' can offer an attractive and very durable surface for driveways and also complement areas of paving. Each cobble/sett is hand chiselled and cut to 40-60mm in depth. Their random, irregular appearance add distinction when laid in a traditional setting. These Natural Stone cobble setts create an impression of greater space. They can be used to edge circles, patios, flower beds and are very useful for awkward spaces when cutting paving stones can prove difficult and unattractive.

DRIVEWAY COBBLES

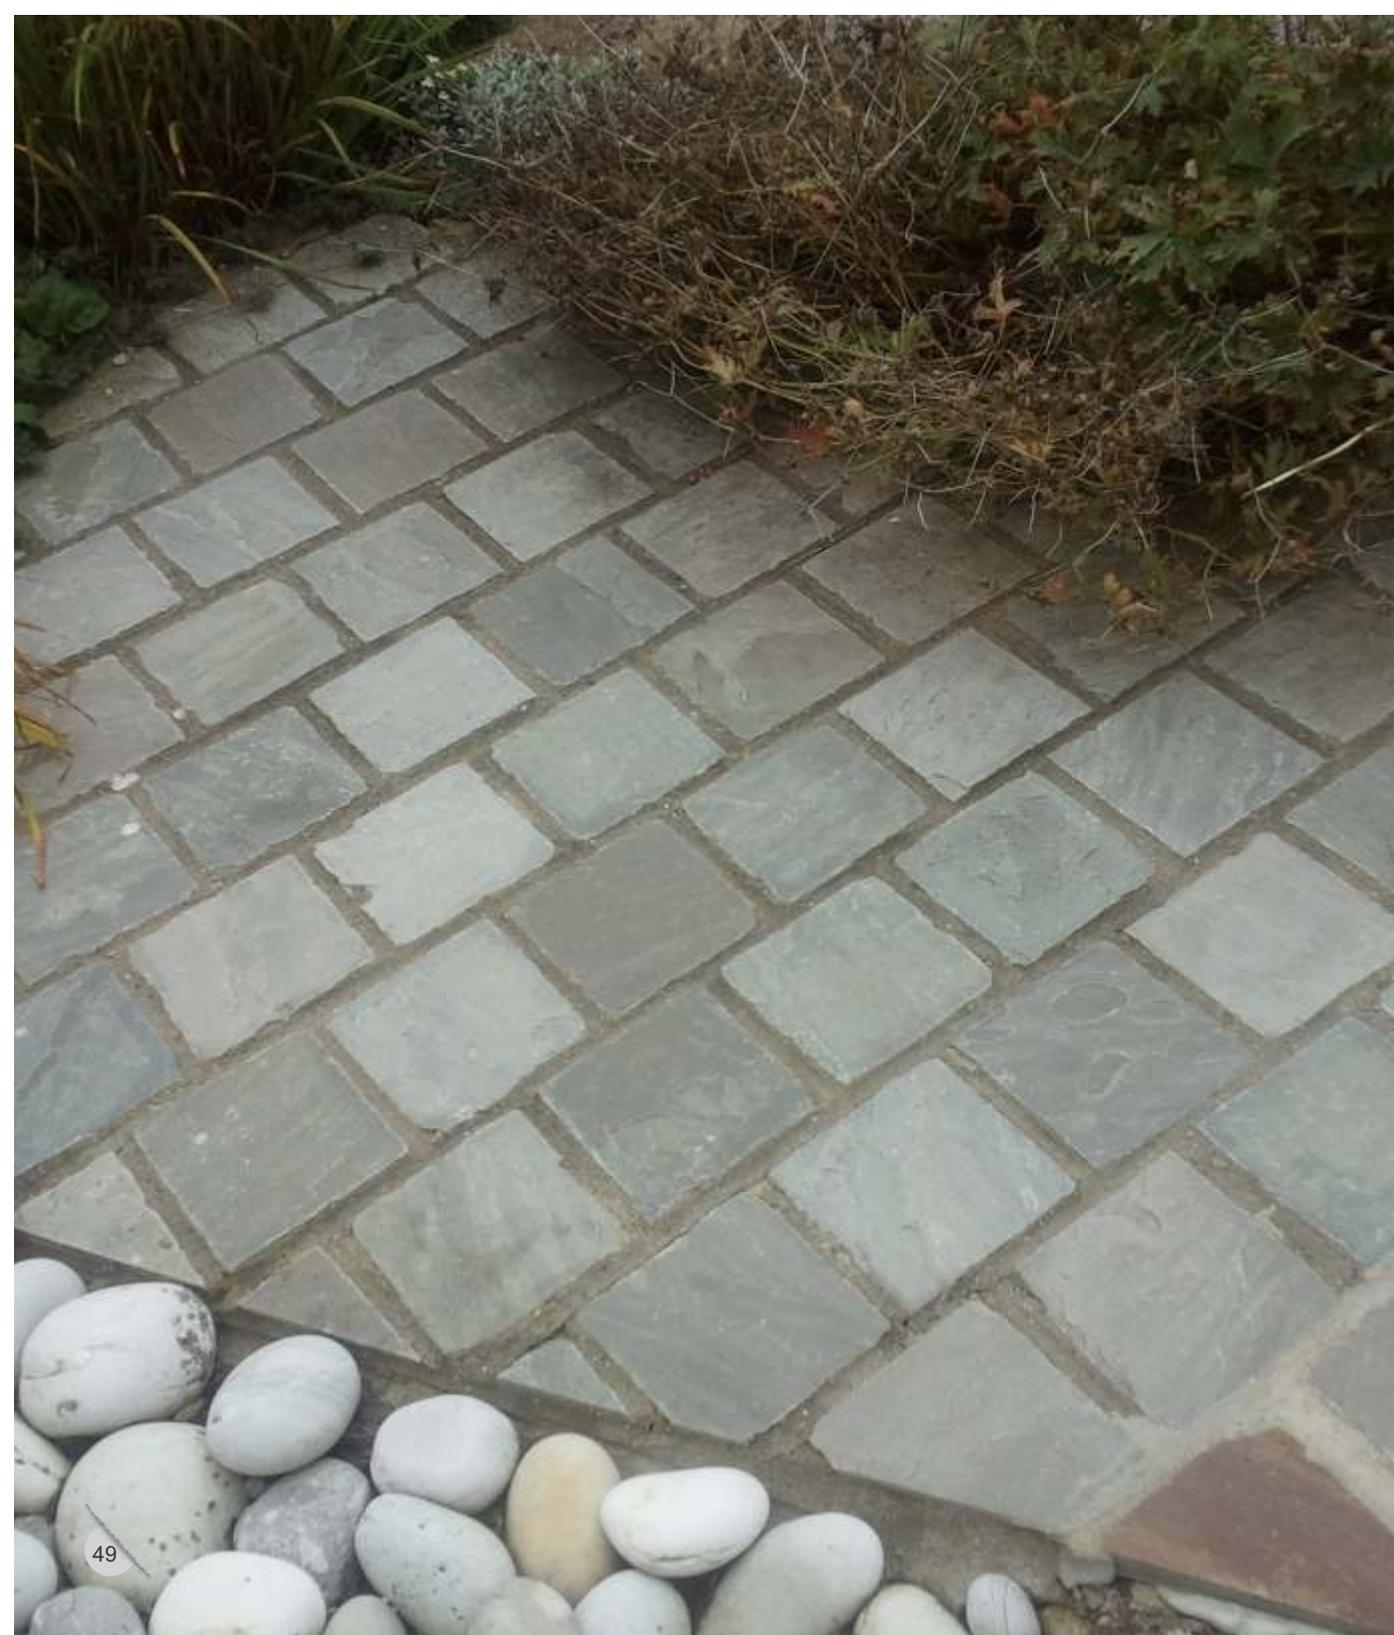

RAJ GREEN

Cobble Setts are an incredibly durable and versatile stone product and as such, Raj Green cobbles are perfect for use as driveways or edging on a paving slab design to create a stunning contrasting effect. It consists of a mix of green, brown and grey tones throughout the stone.
